

# City Line

accent and display lighting

## newport™

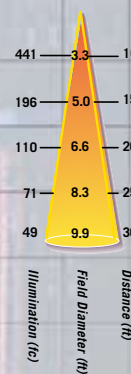

Fresnel spotlights produce a diffused but controllable light. With a variable beam spread and a 150-watt metal halide lamp source, these fixtures are ideal for accent and display lighting applications. CDM lamps offer excellent color rendering (85 CRI), cool color appearance (3000K – 4000K color temperature), extended lamp life (10,000 hrs.) and provide for tremendous energy savings. The Newport™ is available in 120 volt, 208-240 volt, and 277 volt configurations.

**6" Focusing Fresnel  
150W Metal Halide  
Model # 8610**
